PROFESSIONAL EXPERIENCE

CO-FOUNDER & HALF STACK DEVELOPER
Menyoo :: 2016 - Present

Menyoo is my side project, it's a **SAAS** platform for bars and restaurants.
I build the beta version of Menyoo platform using pure PHP with HTML/CSS/JS.
Now I'm developing a new version using Laravel and VueJS.

FRONT END DEVELOPER
Mandaê :: 2016 - 2018

At Mandaê, besides writing code, I also create and develop solutions that are helping hundreds of customers.

- Build UI applications using AngularJS and Bootstrap
- Develop responsive UIs while working directly with Design team
- Responsible for the development of the new institutional website
- Store and consume data from Restful Web APIs and Services

FRONT END DEVELOPER
Bcash / PayU :: 2013 - 2016

At Bcash, I worked in two different teams, Product and IT.

- Prototype new concepts along with a UX Designer
- A/B testings to improve a checkout conversions
- Hotsites and emails for marketing campaigns
- Rebranding project: From Bcash to PayU.
